.....

Always see your doctor if the wound is deep, bleeding or shows signs of infection like reddening, swelling or warmth. Also make sure to seek medical help if you are not able to clean the wound properly. In case you have diabetes a proper wound care is of special importance. Always discuss any concerns you may have with your doctor and/or podiatrist, even for the care of minor wounds and skin cracks – especially on your feet. Please note that none of the above given tips or recommendations substitute medical advice. Carefully read the instructions for use given in our products' packages. Important: consult a health professional in case of any uncertainty of treating your wound properly. The information provided through this website should not be used to diagnose or treat a health problem or disease. It is not a substitute for professional care or advice. If you have or suspect a health problem, you should consult your doctor. Never disregard professional medical advice or delay in seeking it, because of something you have read on this website. For further information regarding Hansaplast products, please contact us via email on phc@beiersdorf.com. Carefully read the instructions for use given in our products' packages.
